Description: The YG series of light freighters was designed to be smaller vessels than the YT series, and more modifiable into combat vessels, the YG-750 for instance come ready for outfitting for missile launchers and changes into a patrol and assault craft. This marketing however was even more squarely aimed at the pirate market than the YT series, and the YG range was retired from production after heavy pressure from the Empire. The YG-750 is however a perfectly serviceable cargo vessel, and although a

little small, especially once better engines and shields have been fitted, the ship has a record of reliability that makes it a worthwhile investment for any starting out freighter captain.
