Description: The GVB Sekhmet is a Shivan design that was initially adapted to Vasudan needs by Hammer of Light engineers. The version currently in use was further modified by technicians at Mekhu Enterprises. Sporting four primary weapon banks and three missile/bomb bays, the Sekhmet packs a massive punch. Add in a top speed that surpasses that of some fighters and an ultra-dense molybdenum armor plating, and it's easy to see why the Sekhmet is the favorite bomber among Vasudan pilots.
