Equipped With:
  - Human-range visual sensors
  - Humanoid body (2 arms, head, legs)
  - Vocabulator
  - Tight-band comlink

Move: 6

Description: A droid taxi, also known as taxi droid, was a form of taxi service/vehicle that was droid-piloted. Luke Skywalker took what he deemed a conservative droid taxi, that was programmed for safety rather than speed. It transported him at street level through the Lodos district of Denon.
