

Planets D6 / Tharnaka

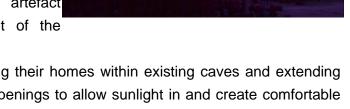

Name: Tharnaka Class: Terrestrial

Atmosphere: Breathable Native species: Tharnakan

Name: Tharnaka was a planet that housed the artefact Tharnakan Story Stone. It was the native planet of the Tharnakan species.

Before the High Republic Era the surface of the world was flooded with the Tharnakan people being forced to flee the world as their towns and villages were flooded and rendered uninhabitable. This happened so quickly they were forced to leave many cultural items behind, making it a target for both legitimate archaeologists and nefarious tomb robbers.
