Description: The Fang is an interceptor, although is capable of operating in other roles, but does these poorly. It is fast but fragile, and considered by many pilots to be a confusing ship to pilot, with too many systems clamouring for the pilots attention while he is speeding through space towards a target. Although the Fang is an older design it is still in common use, but its role can be covered by the better Manta space superiority fighter. More commonly the Fang isn't used for interception, but is used in a support role to the Hammer bombers, the slow heavy bomber being perfectly complemented by the fast nimble Fang.
