Move: 80; 220kmh

Body Strength: 4D+2

Weapons:

Laser Cannons

Scale: Speeder

Fire Arc: Turret

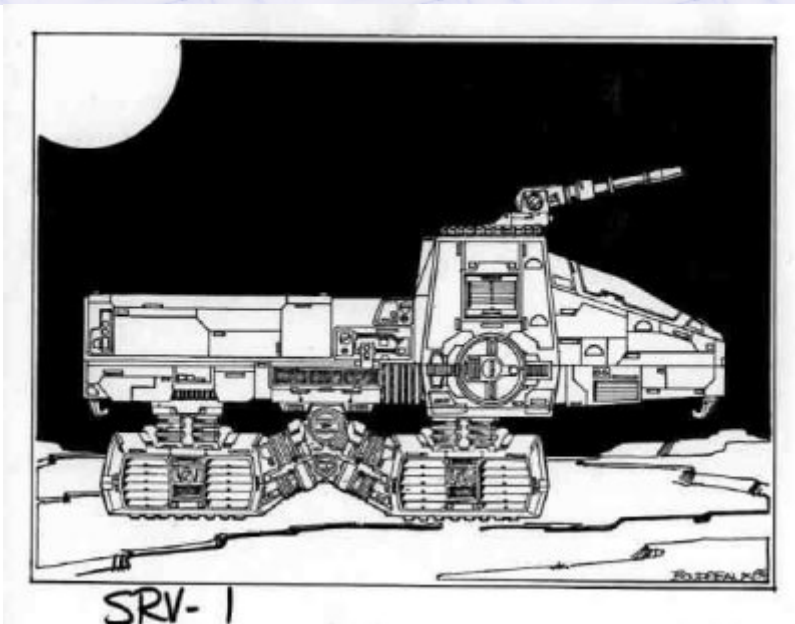

Crew: 1

Skill: Vehicle Blasters

Fire Control: 2D

Range: 15-50/100/250m

Damage: 5D

Description: The SRV-1 was designed for the New Republic as a troop transporter and patrol vehicle, and although only ever produced in small numbers it proved popular enough to be sold on the open market as well. Troops have complained about the cramped conditions aboard, but the fire support it can provide, and the high speed it can maneuver at has made it popular when larger and heavier troop transports have been unavailable. The SRV-1 was originally conceived as a patrol vehicle, but it never really lived up to this role, being nothing more than an armed speeder truck.
