Description: The X-Tie is a hybrid of the standard Tie Fighter and the Incom X-Wing fighter, and mainly consists of a battle damaged X-Wing patched up with Tie components. The resulting fighter is far more fragile than a standard X-Wing, but retains a fair amount of maneuverability and firepower, matching up well against other pirate fighters such as Z-95 Headhunters and Y-Wings, as well as being very favorable in comparison to standard Tie Fighters. The X-Tie is a cheap and common Ugly design, although many have the Proton Torpedo Launchers, Shield Generators and Hyperdrive stripped out as these are the most valuable components of this vessel.
