Vocabulator speach/ sound system
A-30 VerboBrain
TranLang 4 Communications module with over ten million languages

Move: 10
Size: 1.7 meters tall
Cost: 6,000

Description: The 4PO Protocol Droid, is the update model of the extremely successful 3PO series, and includes many technological upgrades from its predecessor. As well as having a larger language database than the 3PO, the 4PO is also faster and capable of moving as fast as a human being, and has an extensive knowledge of communications systems, to make the droid actually useful in more than a single very specialised niche job. The personality of the 4PO has also been updated, changing away from the fussiness of the 3PO series, and more deferential and polite, generally appearing more competant than its ancestors.
