Description: The armour has a 200m line of rope and grapple gun attached to each arm, allowing the user to fire the hooks and rope to climb sheer surfaces.

Climbing Claws

These claws are designed to help the armours wearer to climb trees and other Jungle vegitation, and gives a +2D bonus to climbing rolls.

Description: After the destruction of Alderaan a native of that world, Almek Obsidian, became somewhat obsessive about military power, and set up Core Defence Industries (CDI) to supply defence to other worlds so the same could never happen again. However the unbalanced nature of the industrialist and the corporation he founded, led to many headaches for the fledgling New Republic, as the power weapons and vessels were sold to anyone without restriction, meaning that these state of the art weapons of war were available to terrorists, pirates and other criminals. Fortunately, for the New Republic at least, Almek Obsidian died after only a couple of years, and the absence of his genius, although unbalanced, hand at the helm meant that CDI went into receivership shortly afterwards. The CDI All Purpose Battle Armour, Basic Suit is the basis for the rest of the APBA suits. A modified form of the older Blocker armour, the APBA was designed to be easily modifiable to a variety of different roles, allowing the armour to be used in space and other dangerous environments. The Jungle Suit is an improved version with many similar features to the Desert Suit, and is designed to cope with the conditions in thick forests or jungles. The addition of

Climbing Claws and Grapple Lines to allow the user to clamber around the trees and foliage in these conditions, and although the armour is fairly heavy it can still manage a fairly nimble turn of speed around a forested environment.
