

Vehicles D6 / All Terrain Observation T

Craft: AT-OT

Type: Imperial Light Walker - All Terrain
Observation Transport

Scale: Walker

Length: 8.2 Meters Tall

Skill: Walker Operation; ATOT

Crew: 1

Passengers: 5

Cargo Capacity: 250 kilograms

Cover: Full

Maneuverability: 1D

Move: 20, 60 kmh

Body Strength: 1D

Weapons:

Light Blaster Cannon

Fire Arc: Turret

Scale: Speeder

Skill: Vehicle Blasters

Fire Control: 1D

Range: 50-300/500/1km

Damage: 4D

Description: The All Terrain Observation Transport is a light walker designed to transport commanders, engineers and supervisors around Imperial ground construction sites. As such it is lightly armoured and armed for defence only, as it is never intended to be a front line battle vehicle. The Walker has a docking tunnel allowing passengers to walk inside with ease, and a spotlight mounted on the top for illumination purposes, as well as its turret mounted blaster cannon. These walkers are usually used to allow safe and fast transport around construction sites, and allow the passengers to observe work from an elevated platform, however they are sometimes also used for patrol and guard work in areas where security was presumed to be so unnecessary that ATST's were never assigned. This is a role the walkers perform poorly at, being fragile enough to take damage from hand weapons, although their turret is deadly enough to help defend against poorly equipped attackers. These Walkers are less common than most other types, but can be found in small numbers in areas where large construction projects are ongoing.

Page designed in Notepad, logo's done on Personal Paint on the Amiga.
