Starships D6 / Core Defence Industries Terro

Name: CDI Terror Drone
Type: Core Defence Industries Terror
Class Drone Starfighter
Scale: Starfighter
Length: 15.9 Meters
Crew: 0
Crew Skill: Starfighter Piloting 6D, Starship Gunnery 5D+2
Cargo Capacity: 150 Kg
Cost: 350,000 (New); 150,000 (used)
Hyperdrive Multiplier: No
Hyperdrive Backup: No
Nav Computer: NA
Space: 9
Atmosphere: 350;950kmh
Maneuverability: 2D
Hull: 4D
Shields: 3D
Sensors:
- Passive: 30/1D
- Scan: 50/2D
- Search: 75/3D
- Focus: 5/3D+2

Weapons:
- Twin Light Tachyon Cannons (Fire Linked)
  - Fire Arc: Front
  - Fire Control: 4D
  - Space: 1-5/15/40
  - Atmosphere Range: 100-500/1.5/4km
  - Damage: 8D

Description: After the destruction of Alderaan a native of that world, Almek Obsidian, became somewhat obsessive about military power, and set up Core Defence Industries (CDI) to supply defence to other worlds so the same could never happen again. However the unbalanced nature of the industrialist and the corporation he founded, led to many headaches for the fledgling New Republic, as the power weapons and vessels were sold to anyone without restriction, meaning that these state of the art weapons of war were available to terrorists, pirates and other criminals. Fortunately, for the New Republic at least, Almek Obsidian died after only a couple of years, and the absence of his genius, although unbalanced, hand at the helm meant that CDI went into receivership shortly afterwards. The CDI Terror Class Drone Starfighter, incorporates a number of CDI's proprietary technologies into one highly advanced autonomous starfighter package. The Terror has powerful Tachyon Cannons, on their own independantly moving arms, as well as fast manueverable engines, allowing the vessel to match most other starfighters be they manned or

unmanned. The electronic drone brain is highly skilled, and allows the vessel to be left in a low power mode and only activated when required, scrambling from its hangars in defence of a planet. For this reason the Terror has no Hyperdrive systems, operating from starships, space stations or planetary surfaces, and is designed with defence in mind. The fighter sold in small numbers as although its use saved lives, and it was cost effective in the long term, its high purchase price meant that the lives of pilots in other vessels were cheap in comparison.

Page designed in Notepad, logo`s done on Personal Paint on the Amiga.
