Starships D6 / Huppla Pasa Tisc Shipwrights

Name: Genosian Starfighter
Type: Huppla Pasa Tisc Shipwrights
Collective Nantex-class Territorial Starfighter
Scale: Starfighter
Length: 9.8 Meters
Skill: Starfighter Piloting - Nantex
Crew: 1
Crew Skill: Starfighter Piloting 4D, Starship Gunnery 4D
Consumables: 1 Week
Cost: 45,000 (used)
Cargo Capacity: 15 Kilograms
Hyperdrive Multiplier: NA
Hyperdrive Backup: NA
Nav Computer: uses Astromech
Space: 7
Atmosphere: 350;1000kmh
Maneuverability: 3D+2 *
Hull: 4D+2
Shields: 0D
Sensors:
- Passive: 20/0D
- Scan: 35/1D
- Search: 50/2D
- Focus: 2/3D

Weapons:
- Laser Cannon
  - Fire Arc: Turret
  - Fire Control: 2D
  - Space: 1-2/10/20
  - Atmosphere Range: 100-200/1/2km
  - Damage: 5D

* - The Maneuverability mainly comes from the dozens of tractor/repulsor beam projectors mounted on the hull, these can be set to reduce the manueverability of target craft by counting their manueverability. In use points from the Manueverability are allocated to modify the manueverability of target starfighter scale craft, if enough Nantex fighters co-operate, the manueverability can be reduced to negative dice.

Description: The Nantex class fighter is a twin needle nosed fighter craft design for use by the Genosians for defence of their factories and territory. The cockpit is designed for a Genosian pilot, and unless retrofitted for another species, the complex multi-axis control yokes are difficult to use (-2D to manueverability). The ships main weapon is a turret mounted laser cannon, however this system, along with the engine, is modular and can be replaced for specific missions. The fighters

hull is covered with dozens of independently-aiming narrow-beam tractor/repulsor projectors, these provide the fighter with its fantastic manueverability, but can be used to restrain enemy craft as well. The outer hull of the Nantex is constructed of woven reinforced laminasteel, this flexible building material allows the starfighter to rebound from impacts which would fracture more rigid vessels, which is why the genosian designers felt it unnecessary to mount the Nantex with shields. The Genosians never marketed this fighter to offworlders, however a number were sold off after the Clone Wars as trophies, and their reliable build has allowed them to continue operation as servicable starfighters. Rumours persist of quantities being found on Genosia itself, but the Jedi clear up of this world would have located any caches that were in existence.

Page designed in Notepad, logo`s done on Personal Paint on the Amiga.
