Starships D6 / Kuat Systems Engineering Eps

Name: Jedi Epsilon-100 Starfighter
Type: Kuat Systems Engineering Epsilon-100 Cloaking Module
Scale: Starfighter
Length: 9 Meters
Skill: Starfighter Piloting - Epsilon-100
Crew: 1
Crew Skill: Starfighter Piloting 4D+2, Starship Gunnery 4D+1
Consumables: 2 Weeks
Cost: 585,000 (used); 520,000 (used module only)
Cargo Capacity: 20 Kilograms
Hyperdrive Multiplier: x1
Hyperdrive Backup: NA
Nav Computer: Can Store 5 Jumps
Space: 10
Atmosphere: 450;1200kmh
Maneuverability: 3D
Hull: 4D
Shields: 2D
Sensors:
- Passive: 20/0D+1
- Scan: 35/1D+1
- Search: 50/2D+1
- Focus: 2/2D+2

Cloaking Device: Imperial

Weapons:
- Twin Medium Blaster Cannons
  - Fire Arc: Front
  - Fire Control: 2D
  - Space: 1-3/15/25
  - Atmosphere Range: 100-300/1.5/2.5km
  - Damage: 4D

Description: The Delta-7 Aethersprite was a hugely successful starfighter, purchased mainly by the Jedi Order it was fast, manueverable and deadly in combat. As demands on the design increased when the Clone Wars began, Kuat Systems Engineering began a series of upgrades to allow the design to survive the more dangerous era that had begun, while the fighter was almost completely redesigned as it evolved towards the TIE series of fighters, and number of less well known designs were produced int he meantime. Some of these were direct upgrades like the Delta-20 Warsprite Fighter, but others were evolutions of concepts of the Delta-7. The Epsilon-3 Modular fighter

evolves the concept of a modular design introduced by the Hyperspace ring used by the Delta-7, allowing fighters to be rapidly modified dependant on battle conditions. The Cloaking Module is added to the Epsilon-3 and the combined fighter is called the Epsilon-100, the module is actually an illegal modification of the fighter using technology from the TIE Phantom, adding more powerful stealthed engines, a cloaking device and heavier weapons to the basic vessel. Obvious these modules are extremely hard to get hold of, and very few exist, but the complete vessel is extremely desirable, not only for the cloaking device but also for its performance as a starfighter. The only let down of the design is its light weaponary, which while still effective is very weak and has difficulty harming any modern well shielded vessels.

Page designed in Notepad, logo`s done on Personal Paint on the Amiga.
