Starships D6 / Kuat Systems Engineering Del

Name: Jedi Delta-7 Starfighter
Type: Kuat Systems Engineering Delta-7 Aethersprite
Scale: Starfighter
Length: 8 Meters
Skill: Starfighter Piloting - Delta-7
Crew: 1+Astromech
Crew Skill: Starfighter Piloting 4D+2, Starship Gunnery 4D+1
Consumables: 2 Weeks
Cost: 55,000 (used)
Cargo Capacity: 20 Kilograms
Hyperdrive Multiplier: NA
Hyperdrive Backup: NA
Nav Computer: uses Astromech
Space: 7
Atmosphere: 350;1000kmh
Maneuverability: 2D+2
Hull: 2D+2
Shields: 1D
Sensors:
- Passive: 20/0D+1
- Scan: 35/1D+1
- Search: 50/2D+1
- Focus: 2/2D+2

Weapons:
- Twin Light Laser Cannons
  - Fire Arc: Front
  - Fire Control: 1D+2
  - Space: 1-2/10/20
  - Atmosphere Range: 100-200/1/2km
  - Damage: 4D

Description: The finished model of the KSE Delta-7 Aethersprite (or Jedi Starfighter as it was better known) was unveiled just a few short weeks before the outbreak of the Clone Wars. Designed by Walex Blissex, and officially launched by Jedi representatives Adi Gallia and Aayla Secura, the Jedi Starfighter was only used for a short time before the rigors of war led to its replacement by heavier and better armed versions. Another weakness of the Delta-7 design was that it lacked a built in hyperdrive, however this was compensated for by use of a TransGalMeg Industries booster ring, which allowed these vessels to make hyperspace jumps, although a very small number of advanced prototypes were produced with their own experiemental lightspeed drives. Many Jedi prefered these vessels to the ships of war that replaced them, however most were destroyed as the Clone Wars ended, when the Jedi were hunted down and killed. Some of these vessels have made it onto the open market, but their aged design and poor performance makes them an unpopular

choice in comparision to the more modern fighters on the market.

Page designed in Notepad, logo`s done on Personal Paint on the Amiga.
