

Name: All

Terrain Light Scout Transport

Model: Imperial All Terrain Light Scout
Walker (AT-LST)

Scale: Walker

Length: 6.1 Meters long, 8.2 Meters Tall

Skill: Walker Operation; ATLS

Crew: 1

Passengers: 2

Cargo Capacity: 180 kilograms

Cover: Full

Maneuverability: 1D+2

Move: 40, 120 kmh

Body Strength: 2D+2

Weapons:

Repeating Blaster

Fire Arc: Front

Scale: Character

Skill: Vehicle Blasters

Fire Control: 2D

Range: 50-200/1/2km

Damage: 7D

Twin Light Blaster Cannon

Fire Arc: Front

Scale: Walker

Skill: Vehicle Blasters

Fire Control: 1D

Range: 50-300/500/1km

Damage: 2D

Description: Although the AT-ST was extremely common the demand for walkers to act as symbols of the Empire in patrolling pacified worlds was higher than the Scout Walkers relatively high cost allowed commanders to procure. It became clear that a cheaper alternative was needed, something that led to the design and production of the Light Scout Walker, a vehicle designed to deal with lightly armoured vehicles and infantry. The AT-LST kept the Light Blaster cannons of the AT-ST, but replaced all other weapons with a single repeating blaster, the stripped down frame allowed a higher top speed and more maneuverability, and the smaller weapon load allowed control by a single pilot with space for two passengers. However the light armour made these easy targets for enemies, and they were only deployed in secure areas where they were used as police and security vehicles instead of landspeeders and other lighter vehicles.
