Description: The MC-40 is a light cruiser which like its bigger brother the MC-80 is a converted passenger vessel, and although it is smaller and less well armed, this vessel has helped form the backbone of the Rebel, and then the New Republic, fleet for some years. The MC-40 has become a mobile headquarters for Alliance activities, capable of operating by itself for many years and providing support to almost any situation, its speed and maneuverability have helped its captains avoid trouble with far greater ease than they could have in larger Mon Calimari vessels. While Mon Calimari vessels are the most common in the Republic Fleet they are in a far higher demand than their number can support, meaning that even smaller vessels such as the MC-40 are in constant operation, and many are forced into dealing with situations seemingly beyond their capabilities.
