Description: The Naboo Bomber is an upgraded model of the standard N-1 Starfighter, the weapons of the vessel have been completely reworked with lighter energy weapons being fitted to allow the installation of a custom Proton Bomb Launcher. The Proton Bomb Launcher is a specially designed weapon, extending the range of a standard Proton Torpedo, and including a larger magazine, all of which allows the bomber to be a far more effective assault vehicle. The NB-1 was only produced in very small numbers, with a maximum of only 30 serving with the Naboo Defence forces, and very few being sold to off-world concerns. With an extremely long ranged weapon however, the Naboo Bomber is a very effective strike vehicle, and the few which have ended up on the second hand market have sold well and become popular as not only extremely combat worthy vehicles, but also as well designed and good looking starships.
