Droids D6 / Trade Federation Prototype Destr

Type: Trade Federation Prototype Destroyer Droid
Dexterity: 1D
Blaster 5D, Dodge 3D
Knowledge: 1D
Mechanical: 1D
Perception: 1D
Strength: 2D
Technical: 1D

Equipped with:
Twin Linked Light Repeating Blasters (Range 5-50/120/300, Damage 7D)
Single visual and single auditory sensors - Infra Red Vision
Sheild Generator (+1D)
Armoured Skin (+2D)
Rolling Motive System (Move 18, requires shield to be deactivated)

Move: 6
Size: 1 meter tall
Cost: (available only on the black market) 4,000

Description: This prototype design for the Droideka was a reasonably powerful combat droid, with a high deployment speed, powerful weaponry and its own shield generator. However the poor visual sensor, and inaccurate targetting logic made this prototype design a poor fighter on the battlefield, and led to the abandonment of the design in favour of others. However this was after a large number had already been constructed, most of which were stripped down for parts, but a few remained in storage and later were sold onto the black market after the fall of the Trade Federation during the Clone Wars. These have now ended up in the hands of various criminal organisations, who value these powerful combat machines for their intimidation effect and large guns.

Page designed in Notepad, logo`s done on Personal Paint on the Amiga.
