Description: The Koensayr Pursuer Patrol vessel is a long range starfighter designed for use by law enforcement agencies, it uses parts from the extremely successful Y-Wing series of starfighters and is a rugged and powerful vessel capable of handling itself in combat as well as being capable

of travelling vast distances. The Pursuer is designed to allow a single operative to pursue criminals across the galaxy, and to detain or eliminate them using the vessels weaponry. It has room enough for equipment but lacks any holding facilities, and many consider it underarmed and too slow for the role it is designed for. The sales of this vessel were taking off, with some sector rangers adopting the fighter for their patrols, but large sales eluded it due to the standardisation and general adoption of Sienar designs by the Empire. While some planets bought this starfighter, it remains rare compared to its older brother the Y-Wing and to the vessels used by the two sides in the Galactic Civil War.
