Move: 5
Size: 1 metre
Cost: 1,500 (used)

Capsule: The R5 was the cheapest of the R-unit series manufactured by Industrial Automaton. The line was quickly discontinued due to poor quality and poor sales. It was also a failure as a useful astromech droid, as it only held one set of hyperspace coordinates in RAM. R5s can be found throughout the Outer Rim Territories - they break down easily, and are often up for sale.
