Description: The Raven class starfighter was the last starfighter design by Siemar to be sold on the open market before they started production of the Tie series of fighters directly for the Empire. The Raven shares a number of features with the Tie Fighter, but differs in its use of a hyperdrive and shields. The Raven saw only limited production before weapons restrictions brought in by the Empire forced it to be discontinued, but those who bought it love this ship which they consider to be at least the equal of the famous X-Wing.
