

## Starships D6 / Slayn and Korpil RockG

Name: RockGlider Assault Shuttle  
Type: Slayn and Korpil RockGlider Assault Shuttle  
Scale: Starfighter  
Length: 19 Meters  
Skill: Space Transports - RockGlider Assault Shuttle  
Crew: 1  
Crew Skill: Space Transports 5D, Starship Gunnery 4D+2, Starship Shields 3D  
Passengers: 12  
Consumables: 2 Weeks  
Cargo Capacity: 20 Tonnes  
Hyperdrive Multiplier: X1  
Hyperdrive Backup: N/A  
Nav Computer: Yes  
Space: 7 \*  
Atmosphere: 325;950kmh \*  
Maneuverability: 3D \*  
Hull: 4D  
Shields: 3D  
Sensors:  
    Passive: 30/0D  
    Scan: 50/1D  
    Search: 75/2D  
    Focus: 2/4D+1

### Weapons:

4 \* Auto Blasters  
    Fire Arc: Front  
    Fire Control: 1D  
    Space: 1-8/25/40  
    Atmosphere Range: 100-800/2.5/4km  
    Damage: 5D

\*: This vessel features a standard Verpine stabilization cockpit, this enables it to perform incredibly agile twists and turns for a transport vessel while still retaining a stable firing platform. Should the vessel take heavy damage, and the system fails (a 1-2 on the damage roll) then manueverability drops by 1D, Space Speed drops to 5 and atmosphere speed drops to 250;800kmh.

Description: Although Slayn and Korpil are famous for their starfighter designs such as the B-Wing and Torrent Starfighters, the technology used in these vessels was originally designed for the transport vessels which need to manuever through the Roche Asteroid field where the Verpine dwell. These vessels feature cockpit stabilization systems to allow the pilots to rotate the vessels through small gaps in the field, while avoiding throwing the occupants around in their seats. The RockGlider Assault Transport bridges the two fields that Slayn and Korpil are famous for, making a combat transport vessel which is manueverable and nimble enough to survive the dangers of the modern battlefield. These shuttles have been bought in moderate numbers by the New Republic, keen to phase out the Lambda shuttles which are so visible a symbol of the Empire but remain so common throughout the galaxy. However the RockGlider is somewhat too small to replace the Lambda, and although popular with Republic forces remains an uneconomical way of phasing out the reliable Lambda from Republic service.
