Droids D6 / Cybot Galactica SP-4 Analysis Dr

Type: Cybot Galactica SP-4 Analysis Droid
Dexterity: 1D
Knowledge: 1D
Alien Species 2D, Cultures 2D, Planetary Systems 3D, Value 2D
Mechanical: 3D
Perception: 1D
Investigation 4D
Strength: 3D
Technical: 3D

Equipped with:
Humanoid Body (two arms, head)
Repulsorlift system
Two visual and two auditory sensors - human range
Visual Magnfication (microscopic)
Vocabulator speach / sound system
AX-20 Droid Brain

Move: 8
Size: 1.46 meters tall
Cost: 600 (used)

Description: The SP-4 is a modification of the PK-4 series of worker droids, with improved visual sensors, and an advanced logic system allowing a wide range of skills. However this diversity of skills in the AX-20 brain, is also its main drawback since it does not have any area of expertise, only very generic skills. The SP-4 was designed as an operator droid with analysis skills, however it was mismarketed as an analysis droid, which led to very poor reviews and sales, but this was unfortunate as when put to work with a real analysis droid they make a formidable team, as demostrated by the pair that worked in the Jedi Temple on Coruscant.

Page designed in Notepad, logo`s done on Personal Paint on the Amiga.
