Description: The CEC Republic Star Shuttle did much the same job for the Old Republic that the Lambda and Sentinel class shuttles do for the Empire, acting as small transport ships for both personel and supplies, as well as ship to shore transports for large capital ships. However the Star Shuttle was far bigger than a Lambda shuttle, and was nto as practical for this task. Since the fall of the Republic most of these vessels have been sold off to private concerns, and many have now found themselves in the hands of free traders where they serve as completely practicable space transports and cargo ships.
