Cover: 1/4
Altitude Range: Ground level-3m
Cost: 9,500 (used)
Maneuverability: None
Move: 35; 100kmh
Body Strength: 2D+1
Weapons:

Description: The RTTS is a modified cargo sled, and was used for transporting large quantities of Trade Federation Battle Droids. However it was soon realised that a standard cargo sled was a little vulnerable in the hostile conditions of the battlefield, so the MTT was designed and built. Even after the MTT came into use the RTTS continued to be used to transport Battle Droids around secured territory and on-board ships where using an expensive combat vehicle would be a waste. Since the Trade Federation was defeated during the Clone Wars, RTTS's have been used in a variety of roles, using being converted back into cargo sleds and being used as a cheaper alternative to a Cargo Skiff.

Page designed in Notepad, logo`s done on Personal Paint on the Amiga.
