- 2 Anti-Personel Laser Turrets
  - Scale: Character
  - Crew: Controlled by Co-Pilot
  - Fire Arcs: 2 Front
  - Skill: Vehicle Blasters
  - Fire Control: 2D
  - Range: 2-50/100/200
  - Damage: 5D

Description: The LAAT/c is the main frontline walker transport of the Republic during the Clone Wars. A variant of the LAAT/i infantry gunship, this transport can carry any vehicle in the Republic arsenal up to the size of the AT-TE walker. To support this role, the transport is only armed with two light laser cannons in forward turret mounts for protection. In practice, these craft rely on the much more heavily armed LAAT/i's for protection while landing. The crew consists of one pilot and one load master, who doubles as the gunner.

Page designed in Notepad, logo`s done in Personal Paint on the Amiga.
