Vocabulator speech/ sound system

A-30 VerboBrain

TranLang 4 Communications module with over ten million languages

Move: 10

Size: 1.7 meters tall

Cost: 6,000

Description: The 4P0 Protocol Droid, is the update model of the extremely successful 3P0 series, and includes many technological upgrades from its predecessor. As well as having a larger language database than the 3P0, the 4P0 is also faster and capable of moving as fast as a human being, and has an extensive knowledge of communications systems, to make the droid actually useful in more than a single very specialised niche job. The personality of the 4P0 has also been updated, changing away from the fussiness of the 3P0 series, and more deferential and polite, generally appearing more competent than its ancestors.

Page designed in Notepad, logos done on Personal Paint on the Amiga.
