Description: The Assault Personnel Carrier is a heavy Griven transport vehicle which can carry 20 Griven soldiers or human sized droids who can be deployed out of a front and rear ramp. The vehicle also has 2 infantry ports on top of the turret with repeater cannon locks, and 2 more on the front of the main hull which allow 4 infantry gunners to fire from 50% cover in support of foot soldiers. Although not as fast as the Griven Air Support Speeder, but the Assault Carrier is more heavily armed and armoured which allows it to safely operate in heavy combat conditions being supported by Griven combat droids.
