

Type: Roche

J9 Worker Drone

Dexterity: 1D

Knowledge: 3D

Languages 8D

Mechanical: 2D

Communications 5D, Sensors 5D

Perception: 1D

Strength: 2D

Lifting 4D

Technical: 2D

Computer Programming/Repair 6D, Droid

Programming/Repair 5D

Equipped with:

Humanoid Body (two arms, two legs, head)

Two Visual Sensors - High Frequency

Range as well as Human Range (ultraviolet)

Two Auditory Sensors - Human Range

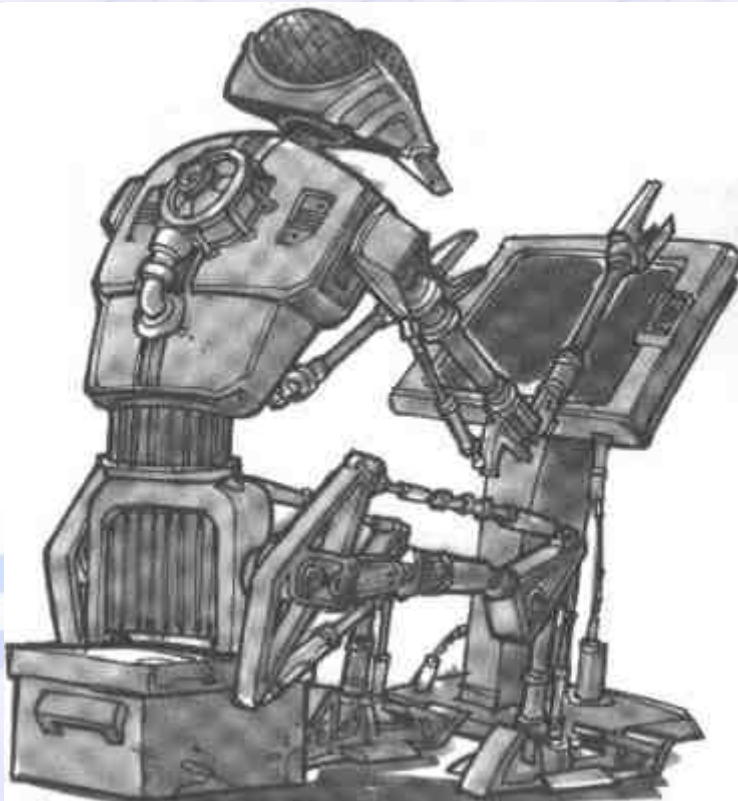

One Olfactory Sensor

Torplex Microwave Sensor

Arjan Vocabulator speech system

Arjan II logic Computer

Tranlang II Communications Module (1 Million languages)

Move: 7

Size: 2.0 meters tall

Cost: 1000 (used)

Description: The J9 Worker Drone was built by the Verpine of the Roche hive, and resembles a stretched out preying mantis. The insectoid look to this droid made it unpopular with the majority of mammalian species in the galaxy, and the production run was therefore fairly short as sales failed to materialise. The Worker drone name was unfortunately taken literally when the droids were sold off at discounted prices, and most of the droids have ended up working in factories and loading facilities, a pity given that they are as advanced and intelligent as protocol droids, and have a wide variety of skills. The Arjan vocabulator system used in these droids is keyed to the frequencies used by Verpine and many other insectoid species, making the droids voice somewhat "bussy" but still easily understandable in all of the 1 million + languages that the droid speaks.
