    Move: 20, Legs
    Size: 16 Hands
    Cost: 15,000 Credits
    Availability: 1
    Personality Matrix: Complex

Description: The Cybot Galactica N1 Nightmare was designed as a companion and guardian droid for those explorers who wished to have a more natural means of transportation that didn't require constant feeding and care and also had the ability to converse with them. A man contacted Cybot Galactica in order to procure a custom designed horse droid and finding that such a market was open to them they created the N1 Nightmare with great success. It's rugged design and completely horse like exterior along with complex synthmuscle and synthskin makes the N1 Nightmare as close as possible to a real horse, while including all the benefits of a droid with a good sensors package and the ability to move fast.
