Description: The Viper patrol ship is used by the Mandalorian Empire as a scout and patrol vessel. Capable of carrying troops, some equipment and supplies for long missions, it also serves as a transport for commando missions. The Viper can handle itself in combat with starfighters and with its speed and cloaking device is an impressive ship to see in operation. The Viper is however very expensive and its role is covered by a number of other Mandalorian ships so is not seen in service a great deal, however as older vessels are phased out of service it is probable that the Viper will be manufactured in greater quantities to fill the gap left.
