Equipment D6 / Dark Well Sniper Armor

Dark Well Sniper Armor

Akira's Dark Well Armor is made up of light plates covered in a special coating that actualy creates a well of darkness causing the light to go around the person. While in broad daylight this isn't enough to render the user invisible it is enoguh to make them very hard to pick out in low lgiht as their outline is disrupted by the lightbending. The armor's shape is also made irregular so it looks as little like a body as possible. This also allows, even in dayligt, an unmoving sniper in their perch to be very well hidden from spotters.
