Equipment D6 / Vetricon VC-5 Combat Armou

Vetricon VC-5 Combat Armour

Vetricon produced the VCx series of modular armour components to sell out on the market as a mix and match armour set. For more serious clinetele such as their favorites, the Hammer's Slammers, they created a full suit. The VC-5 suit put all the VCx components togteher along with a combat jumpsuit and sealed bodyglove. The bodyglove regulates the wearers body temepratures extremely well. The helemt has a built in miltiary comlink, pull down face plate with passive lgiht enhancement and amcrobinoculars, amd a motion sensor which displays it's data to a HUD on the visor. A breath mask can be pulled down voer the nsoe and mouth to filter out hamrful agents in the air such as nerve gas or the like. A handful of specialised holsters and sheaths are also set across the armour to carry weapons. The VC-5 is the mainstay armour of Hammer's Slammers' infantry and is used to the almost total exclusion of other armour.

Model: Vetricon Enterprsies VC-5 Modular Combat Armour
Type: Field Armour
Scale: Character
Cost: 3,600 credits
