Equipment D6 / Vetricon VCB-5 Arm Bracers

Vetricon VCB-5 Arm Bracers

Like the leg greaves, the arm bracers were designed to be sold compeltely independant of any other part of the armour, or all togetehr as a whole. The rbacers are made of palstoid with a flexible elbow joint. They do not provide any startlign ammount of protection but are often worn over combat jumpsuits for extra protection. The only thing really special is that like the greaves, the rbacers have specialised sheaths and holsters on them to carry aditional weapons.
