Description: Shankly was an individual who belonged to a pointy-eared humanoid species. Shankly was present on the moon Bibin during its moon-wide evacuation in the aftermath of General Nawaam's firing of a kyber crystal cannon on Bibin's nearby gas giant Talos, circa 234 ABY. A citizen then led a search party that looked for individuals to evacuate. He presented the Jedi Kwana with a log of those who were accounted for, including the holographic likeness of Shankly, as well as their name, written in Aurebesh. After reviewing it, Kwana stated the evacuation could

begin.

Around the time of the evacuation, Shankly possessed short brown hair, and pale, wrinkly skin. In the hologram reviewed by Kwana, the evacuee wore a purple turtleneck tunic.
