Titan Technologies Devastator Heavy Combat Armor

The Devastator HCA was the first of its kind. It started the long line of Titan Tech's Heavy Combat Armor. The HCA was a revolutionary advancement for ground troops. It allowed a single man to be turned into a heavy combat warrior. It used an extremely advanced kind of control, the Neuro-Helmet. It allowed the pilot's nerves to control the arms and legs like his or her own. But a major drawback was found. The pilot could have neural feedback from the systems when they took damage. Even though the HCA is still used throughout the galaxy by both New Republic and Imperial forces.
