

Equipment D20 / MetaCorp Jumptrooper

MetaCorp Jumptrooper Assault Armor

The Jumptrooper Assault Armor is a heavily modified version of the MetaCorp Stormtrooper Armor. The two armor types almost look identical except for the more 'reinforced' appeal. A noticeable difference in the Jumptrooper armor is the large repulsor pack and controlling exhaust ports on the upper back of the armor. The Jump Packs are activated by a pressure sensitive plate on the thumb of the left armor gauntlet and are steered by rotating the body. To jump accurately, it takes months of training drills. The armor also uses an advanced hydrolic system that predicts movement, ridding itself of the dexterity penalty and increasing the movement rate.

Despite it's militaristic appearance, Jumptrooper Armor is widely sold to Bounty hunting and Mercenary guilds, and is often found amongst pirate bands and even rival corporations. Although illegal to be sold on the Imperial market, to be in possession of one only requires the proper licenses. And for customers with cash to spare, the armor can often be customized to their liking due to it's modifiable nature as MetaCorp's stormtrooper armor element. Afterall, User Friendliness is MetaCorp's goal.

Model: MetaCorp Jumptrooper Assault Armor

Type: Medium (Full Body Fast-Attack Armor)

Cost: 8,500

DR: 4

Max Dex Bonus: + 5

Armor Check Penalty: -3

Speed: 13 (10 m), 9 (6 m)
