

Adelphi db9 Double Barrel pistol

The Adelphi db9 is not a totally original concept. People have been trying to make a double barrel blaster that was worth the effort for quite a while. Rather than working with carbines or rifles though, Adelphi chose to stick with pistols, something they worked with exceptionally well. The barrels can be fired separately or together. Fired separately, each shot is as powerful as the blast from a DL-19 blaster pistol, but fired together it has a stopping power equal to that of the DL-44 heavy blaster.
