WM-19 "Stopper" Blaster Carbine

The Stopper was a blaster carbine designed for a small band of rebels that were situated on a world with very hard rock. The standerd blasters didn't have enought power, and they couldn't afford anything as big as a rocket device. So they opted to bribe the blaster manufactere to build them these carbines. Being careful about the carbine exploding in there
faces, the very first test they rigged up a small holder and a piece of rope to pull the trigger. The tester stood directly behind the gun and puylled the rope which in turn pulled the trigger. The mess was not a pretty sight. The rebels used theses only in extreme situations, but ended up killing themselves on the hard rocks when they fired this gun.

Model: Weapons Master "Stopper" Blaster Carbine
Type: High Powered Blaster Carbine
Cost: NFS
Damage: 6d8
Critical: 20
Range Increment: 7 m
