# Equipment D20 / Mestic Munitions Pocket Pis

Pocket Pistol

The pocket pistol is Mestic Munitions best selling firearm and can be found on many major worlds anywhere in the galaxy. It is small enough to be easily hidden in anyone's pocket and rivals most hold-out blasters.

It fires the same ammunition that many other Mestic models use, only it doesn't use an ammo clip. A single round is loaded into the barrel while in the open position, the barrel is then locked down and the weapon is ready to fire.

The pocket pistol is not readily able to be fitted with any standard silencer and usually attracts a lot of attention when fired due to the loud popping sound it creates.
