Equipment D20 / Quad-Chambered Magnum

Quad-Chambered Magnum

The barrel of this pistol, which is in a square emtal casing, houses four distinct chaambers. The pistols can be fired either in a burst of four or semi-auto. In semi-auto a revovler like mechanism spins rounds up into the chambers and launches them. It can make one and a half full rotations every five seconds, i.e. 6 rounds every 5 seconds or just over a round a second. This weapon is fairly popular among hitmen.
