

Weapons D6 / Mestic Munitions Model

Mestic M-14 Rifle

The Model 14 rifle was, like the number suggests, the 14th design in the M-series line of rifles. The first thirteen designs were either defective in some way, inferior, or a combination of the two. The M-14 was the first one that Mestic's owner approved of. It weighs 4.1 kilograms, is capable of semi or fully automatic fire, it can mount a bipod, and has a folding stock to minimize length for close quarters combat.

Model: Mestic Munitions Model 14 Rifle
