

Weapons D6 / Mestic Munitions Model

Mestic M-21 Sniper Rifle

The M-21 was the standard sniper rifle found all over the Palvar Sector until the advent of the M-16m. It was designed with some of the same aspects in mind as the older Model 14 rifle. The M-21 was the first in the M-series to see the production lines ever since the widely successful Model 16 proved to be top of the line, outdoing Models 17 through 20 with its several variants. These variants proved to be the final weapons introduced into the M-series, the Model 16m being the last before Mestic officially discontinued the M-series for their new AR-series of rifles.
