

Weapons D6 / VerdanTech xm1014 Co

VerdanTech xm1014 Combat Shotgun

The xm1014 pump action was an improvement on the previous m3 design. Using new modular design it used smaller but just as potent ammunition and was able to fit two extra rounds in. The weapon itself is made of a more durable alloy and the weapon's center of mass has been lowered. A pull out stock can be locked into place or slid in for easy storage and movement of the weapon. The weapon has a slightly faster discharge rate than the m3 and fell into popularity among gangs who could get their hands on the weapon.
