

## Creatures D6 / Grutchinya (Yuuzhan Vong)

Name: Grutchinya

Type: Yuuzhan Vong Genetically Created Insect

Dexterity: 2D

Perception: 3D

Strength: 5D

### Special Abilities:

**Yuuzhan Vong Pet:** Yuuzhan Vong Pets, like themselves, are completely undetectable through the Force, and cannot be directly affected by it (indirect methods, such as throwing a rock at the pet, still work, but powers such as Lightsaber Combat, Detect Life or Telekinesis do not work).

**Fearsome Appearance:** The Grutchinya is a large insectoid lifeform. Its appearance taps into the primal subconscious fear of insects, and thus it receives an additional +1D intimidation.

**Claws:** STR+2D (converts to match scale of opponent up to Starfighter scale) The Grutchinya's claws also have the ability to dig through solid rock.

**Mandibles:** STR+3D (converts to match scale of opponent up to Starfighter scale)

**Acidic Secretions:** The Grutchinya's mandibles secrete acid that could quickly melt through metal, and made short work of flesh. Acid Damage 5D (converts to match scale of opponent up to starfighter scale: Character scale opponents receive no armor bonus)

**Armored Shell:** The Grutchinya's armor shell grants a 2D/2D protection against energy and physical attacks.

Move: 6 (on legs), 20 (atmosphere)

Size: 1.3 meter length

Orderliness: 3D

**Description:** The Grutchinya was a close relative of the genetically created Grutchin used by the Yuuzhan Vong. The Grutchinya was created in response to the rising need to use Grutchin within a planetary atmosphere. The larger Grutchinya was created to fill the role of a planetary Grutchin. The Grutchinya was similar in many ways, although much larger and engineered with a much stronger shell. A number of improvements were made to the creature's strength and abilities, which also required some training on the part of the Intendants caring for the creatures.
