

Weapons D6 / Heavy Crossbow

Heavy Crossbow

The Heavy Crossbow is a modification of the Hand crossbow. Originally Heavy Crossbows were large things that men needs both hands to fire, and the aid of their feet to reload. These Heavy Crossbows, are slightly smaller than a blaster carbine. They can be held one handed, a stock resting back against the arm so it will tuck into the elbow for one handed firing. The Heavy Crossbow uses servomotors instead of simple machines to propel the arrow

Model: Typical Heavy Crossbow

Type: Crossbow
