

Arbitron Neural 'Brain Drain' Blaster

The Neural Blaster is one of the most vile, destructive weapons Arbitron has ever created. They publicly deny the existence of such a thing, and have never admitted that project 'Brain Drain' ever existed. There are however many theories that the NB-DB was an experimental device that matched certain brain waves and violently contorted them in conflicting patterns, causing violent, and gruesome, results. No evidence was found of it, and the only prototype that was thought to exist has never been found since the scientist that created it, alias 'Nova Creed', disappeared into thin air. There have been many investigations into the existence of the NB-DB, but no conclusive evidence can be found to state such a thing was ever made. One can only hope that if it does exist, no one will ever mass produce it for his own personal army of death.
