  - Damage: 8D

Description: The Eta-5 interceptor was a type of snubfighter in use by the Galactic Alliance Navy as of 40 ABY. Its name suggests that it was a descendant of the Eta-2 interceptor, but it was apparently regarded as a type of A-wing.

The Eta-5 was powered by twin ion engines, giving it top of the line speed and maneuverability, but it had low armor and minimal shielding. It was equipped with dual fire-linked concussion missile launchers, laser cannons, and advanced computer targeting systems, giving it considerable punching power when it needed to engage small capital ships.

Wedge Antilles's daughter, Syal Antilles, flew this model when she entered the Galactic Alliance military under the name of Lysa Dunter. She joined VibroSword Squadron.
