Planets D6 / Nekkid

Nekkid

Nekkid is one of two worlds in the Palvar Sector that is a part of the New
Republic and lays along the border with the Neavious Sector. It is fairly
sparsely populated despite being almost twice the size of Kashan. Much of
the planet remains untouched and in its naturally forested state.

Nekkid has only four major cities, all within a thousand kilometer area. The
planet's entire economy revolves around two industries, repulsorlift engine manufacturing and mining. Most of the repulsorlifts are exported to various locations throughout the region, while the ores are mainly sold to Kashan Systems, Setec Astronomy, and Wereling Spaceworks.

Nekkid is defended by a handful of orbital space mines and a KDY v-150 planet defender. The New Republic maintains a small garrison for defense against any planetary invasion. The risk of such an attack is minimul, as the nearest Imperial controlled world is beyond the area protected and patrolled by the Palvar Defense Force.

Type: Mild terrestrial
Location: Mid Rim: Palvar Sector
Temperature: Mild
Atmosphere: Type I (breathable)
Hydrosphere: Moist
Gravity: Standard
Terrain: Forests, mountains
Length of Day: 25 standard hours
Length of Year: 324 local days
Sapient Species: Humans, various other species
Starport: Standard
Population: 1.93 billion
Planet Function: Raw material source
Government: Senate
Tech Level: Space
Major Exports: Foodstuffs, mid tech, ore, repulsorlifts
Major Imports: High tech, mining equipment, miners
