Starships D6 / Particle Acceleration Cannon (

Particle Acceleration Cannon (PAC)

Model: Setec Astronomy's PAC-1
Type: Heavy ship-to-ship particle acceleration cannon
Scale: Capital
Skill: Starship gunnery
Cost: 50,000 credits
Weight: 10 metric tons
Availability: 2, F
Space Range: 10-50/25/100
Atmosphere Range: 20-100/50/200 km
Fire Control: 3D
Damage: 6D

The particle acceleration cannon was a concept first developed by the evil and chaotic Umgah as a new means of destroying anything in sight. Setec Industries, a small company based out of the Theta Orionis star system, near the Umgah's home system (Beta Orionis), managed to get a hold of the design aspects of the particle acceleration cannon through means of highly illegal espionage. Since then, Setec has developed the Umgan design into a capital ship weapon, and placed it on the open market hoping that someone like the New Republic or one of the various Imperial warlords will pick up a contract to manufacture and buy the weapon.
